

SmartConnect

SmartConnect is now available for Magento 2. SmartConnect allows you to actively support your webshop's checkout with the collection and delivery options your clients want from you. The module has been built entirely in accordance with the Magento 2 standards.

Checkout support

With SmartConnect, you can connect your carriers directly from Magento 2 to your webshop, and you can determine which shipping options (and costs) you wish to have displayed in the checkout. You can see all your carriers' collection points together in the checkout, so that your client can choose which carrier they wish the package to be delivered by. For each collection point, the client sees the relevant carrier's logo. It is also possible to show in your checkout which carriers or collection points are not connected by way of Transmart. These may include your own shops or collection orders, for example.

LOCATION SELECTION

Carrier	Address	Distance	Logo
TRANSMART	Ellen pankhurststraat 1C 5032 MD, Tilburg	0.68 KM	your company logo
JUMBO BLAAK	Amer 13 5032AZ, Tilburg	0.76 KM	postnl
PRIMERA	Amer 7 5032AZ, Tilburg	0.78 KM	postnl
STAPLES OFFICE CENTRE	Charles Stulemeijerweg 3 5026RS, Tilburg	1.08 KM	postnl
SPAR ZORGLIED	Burgemeester Van de Mortelplein 41 5037PJ, Tilburg		DHL

If you wish, you can enter the transport costs for each shipping option. This can be done on a fixed price basis, on the basis of Magento table rates, or on the basis of your transport contract, so that the exact shipping costs are displayed.

Collection & delivery points

SmartConnect is integrated seamlessly into the Magento sales and shipments menu. The configuration makes it possible to define the collection & delivery options per store view. This allows you to actively support the checkout with information about collection points, opening hours and shipping costs.

Drawing up, booking and printing shipment notes

In the Sales module, individual or batch orders can be processed into shipment notes in just a couple of clicks. Shipment notes are made and can be booked and printed immediately if necessary. This means you can easily amend the shipment before the label is printed. Partial deliveries and return orders can also be set up in Magento 2.

Track & Trace

The Track & Trace information is retrieved at the time the booking is made available in Magento 2 so that it can be sent to your clients via Magento standards. If necessary, Transsmart can also send the Track & Trace email to your clients. The Track & Trace link and status feedback for every shipment is available in Magento 2 at all times.

The advantages

The Magento module is available in two versions. The first version contains the checkout support, and the second version, the supplementary module, supports the connection with carriers and allows shipments to be booked and printed immediately.

Advantages of the checkout module

- ✓ Seamless integration of shipment options in your checkout
- ✓ You determine which collection and delivery options your clients can use
- ✓ You determine what costs the client pays per shipping option
- ✓ Collection and delivery options are defined per store view
- ✓ All collection points for dozens of carriers in a single, clear view
- ✓ Option to add your own collection points (shops)
- ✓ Simple integration with your ERP system possible for processing your orders

Advantages of the supplementary module

- ✓ Book and print orders with just a few clicks
- ✓ Shipments can be changed right up until the label has been printed
- ✓ Shipments can be booked and printed in bulk
- ✓ Partial delivery and returns easily created
- ✓ Status of shipments can always be displayed
- ✓ Several users with their own printers can be connected
- ✓ Full integration with other Transsmart products is possible, including SmartTrack and SmartLabel
